

*Setting the standard in laboratory medicine for a healthier world.*

To Whom It May Concern:

CLSI is the exclusive provider of membership options that grant access to CLSI standards, opportunities for professional development, and participation in the development of guidance and tools that advance the field. A comprehensive overview of our membership plans is available [here](#).

CLSI guidance is recognized as the gold standard for laboratory compliance by regulatory bodies like the US FDA, the EU, and accreditors such as the College of American Pathologists (CAP) and the Commission on Laboratory Accreditation (COLA). The CLSI consensus process brings together over 2,000 subject matter experts from industry, government, and healthcare to create laboratory guidelines and standards for clinical laboratory testing. No other organization offers the depth of laboratory subject matter expertise or the regulatory support that the CLSI offers.

Sincerely,

The CLSI Membership Team
