30 June 2021

To: Recipients of VET01S, 5th ed.

From: Jennifer K. Adams, MT(ASCP), MSHA
Vice President, Standards and Quality

Subject: Correction

This notice is intended to inform users of a correction made to CLSI document VET01S, *Performance Standards for Antimicrobial Disk and Dilution Susceptibility Tests for Bacteria Isolated From Animals*, 5th ed. The correction is described below and shown as highlighted and/or stricken text in the table excerpt.

**Appendix D. Dosage Regimens Used to Establish Susceptible Veterinary-Specific Breakpoints:**

The Table 2G, *Mannheimia haemolytica* penicillin G dosage regimen for cattle is listed incorrectly as “33 000 U/kg IM by needle in neck every 24 hours.” The dosage regimen for cattle has been corrected to read “22 000 U/kg IM by needle in neck every 24 hours.”

**Appendix D. Dosage Regimens Used to Establish Susceptible Veterinary-Specific Breakpoints**
